

BAKTI DWI PAMUNGKAS

Informatics Engineering Student · AI & Machine Learning Enthusiast

Sumedang, Indonesia | baktidwipamungkas@gmail.com | 089656428641 | [linkedin.com/in/baktidwipamungkas](https://www.linkedin.com/in/baktidwipamungkas) | github.com/BAKTIDWIPAMUNGKAS

OBJECTIVE

Motivated 3rd-year Informatics Engineering student (Semester 6) at Universitas Siliwangi with a strong focus on Artificial Intelligence and Machine Learning. Skilled in implementing deep learning architectures, building computer vision systems, and leading technical initiatives within student organizations. Seeking an internship opportunity to apply hands-on AI/ML skills in a real-world engineering environment.

EDUCATION

Informatics Engineering (S1) | Universitas Siliwangi 2023 – Present

- ▶ Active member and contributor in HMIF FT-UNSIL student organization
- ▶ Focused coursework in algorithms, data structures, and software engineering

Machine Learning Specialization | Coursera – University of Washington 2025 – 2025

- ▶ Covered supervised/unsupervised learning, neural networks, and recommendation systems

Machine Learning Learning Path | Coding Camp 2024 – DBS Foundation 2024 – 2024

- ▶ Completed end-to-end ML pipeline projects including data preprocessing, modeling, and evaluation

ORGANIZATIONAL EXPERIENCE

Vice Chairperson (Wakil Ketua) | BPO HMIF FT-UNSIL 2026 – Present

- ▶ Assisted the Chairperson in leading and coordinating all BPO commissions and staff
- ▶ Oversaw day-to-day organizational operations and ensured alignment with MUMAS mandates
- ▶ Acted as a liaison between commission heads to streamline inter-commission collaboration
- ▶ Represented the organization in internal deliberations and provided institutional recommendations

Member – Komisi I (Legislasi) | BPO HMIF FT-UNSIL 2025 – 2025

- ▶ Drafted and designed organizational regulations in accordance with board deliberations and chairperson policies
- ▶ Provided review and consideration for proposed regulatory frameworks within HMIF FT-UNSIL
- ▶ Collaborated with fellow commission members to ensure legislative outputs were comprehensive and enforceable

PROJECTS

Plantify – AI-Powered Plant Disease Diagnosis App | Personal Project 2026

- ▶ Built a full-stack web application enabling farmers to diagnose crop pests and diseases by uploading plant photos
- ▶ Integrated multimodal LLM via OpenRouter API with structured prompt engineering to return expert-level diagnosis including pest/disease name, severity level, recommended pesticide, dosage, and treatment steps
- ▶ Designed a comprehensive JSON-based prompt schema to ensure consistent and actionable AI outputs for agricultural use cases
- ▶ Tech stack: Python, Flask, OpenRouter API (Gemma Vision), HTML/CSS/JavaScript

Sentiment Analysis: LSTM vs Naive Bayes on Iran-Israel Conflict Tweets | Personal Project 2026

- ▶ Scraped and curated a dataset of 2,000+ tweets on the Iran-Israel conflict using Playwright-based Twitter crawler with multi-keyword and time-window strategies
- ▶ Built full NLP preprocessing pipeline including translation, tokenization, stopword removal, and stemming using Sastrawi
- ▶ Trained and compared LSTM with word embeddings vs TF-IDF + Naive Bayes across accuracy, F1-score, and confusion matrix for 3-class sentiment classification
- ▶ Tech stack: Python, TensorFlow/Keras, Scikit-learn, Pandas, NLTK, Sastrawi, Matplotlib, Google Colab

SKILLS

Languages: Python

Frameworks & Libraries: PyTorch, TensorFlow, Keras, Scikit-learn, Flask, NumPy, Pandas, OpenCV, Matplotlib, Seaborn

Concepts: Machine Learning, Deep Learning, NLP, Computer Vision, Sentiment Analysis

Tools: Git, GitHub, Google Colab, Visual Studio Code, Jupyter Notebook

Soft Skills: Team collaboration, critical thinking

CERTIFICATIONS & TRAINING

- ▶ Machine Learning Specialization – Coursera / University of Washington (2025)
- ▶ Machine Learning Learning Path – DBS Foundation Coding Camp (2024)
